Dear colleagues,

We are delighted to invite you to our fourth continuing education event, **"Focus on Pathology"**, at the Sankt Anna Stiftung conference center in Lucerne.

This two-day symposium will take us on a journey through current topics in PATHOLOGY. The publication of a new WHO classification is always a milestone for PATHOLOGY, as it has a significant impact on diagnostics in PATHOLOGY. Lectures on the PROS and CONS of these new classifications therefore attract not only many pathologists, but also those interested in oncological issues, precision medicine, or molecular diagnostics.

As you can see from the attached draft program, we have succeeded in attracting a large number of renowned international speakers who were instrumental in the development of these classifications. These speakers will highlight the relevant innovations in the WHO classifications and, following the presentations, will be available for lively discussions, which are already a familiar feature of our event.

We hope that this program has piqued your interest and we look forward to welcoming you to this symposium in Lucerne on January 19. and 20. 2027.

With best regards
